

# Press Release

**Date:** 22 August 2008

**Subject:** Site investigation works at Lindhurst Wind Farm

Investigation work will be carried out on the site of Lindhurst Wind Farm, near Mansfield, between Tuesday 26 August and Tuesday 2 September.

Residents may notice some equipment on site while the work is underway, including a digger. This should not cause any disruption to local people on what is a working farm and when completed all equipment will be removed from the site.

Councillors voted eight votes to three in favour of the Lindhurst Wind Farm application at Newark and Sherwood District Council's planning committee meeting in September 2007.

Cath Stevenson, Development Manager at npower renewables said; "This activity on the wind farm site doesn't mark the start of construction, it is just preliminary investigation work.

"Once construction begins, npower renewables will issue a newsletter to local residents explaining the process and what will be happening on the site. Up to date information is also available on our website."

If local residents would like more information they can visit:

**Editor's notes**

1. npower renewables is one of the UK's leading renewable energy developers and operators, committed to developing and operating wind farms and hydro plant to produce sustainable and environmentally-friendly electricity. The company operates 17 hydroelectric power projects and 19 wind farms in the UK, including the country's first major offshore wind farm, North Hoyle. npower renewables is also working with marine energy technology partners to deliver new wave and tidal stream power projects in the UK. Through our existing projects and those in development, we are working in close partnership with communities and companies throughout the UK. As Government policy drives the UK towards a target of supplying 10% of electricity from renewables by 2010, and 15% by 2015, we will be at the forefront of realising this aim.

npower renewables is a fully owned subsidiary of RWE Innogy, and sister company to RWE npower, a leading integrated UK energy company, whose activities include the co-firing of biomass and the implementation of a major energy efficiency programme.
